Stevan A. Resar Primary Examiner Art Unit, 1773

- An examiner's amendment to the record appears below. Should the changes
 and/or additions be unacceptable to applicant, an amendment may be filed as provided
 by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be
 submitted no later than the payment of the issue fee.
- This application is in condition for allowance except for the presence of claims 7-15, 23-25 directed to an invention non-elected without traverse.

Accordingly,

Claims 7-15 and 23-25 have been cancelled.

The following is an examiner's statement of reasons for allowance:

The claims are deemed allowable for at least the reasons presented in the appeal brief that the carbon layer made according to applicants process is patentably distinct from that made by the process of Mahoney et al.

The examiner now considers that while some of the carbon structure reflected by the Raman G band is identical to that of Mahoney et al., other carbon structure would necessarily be present due to the sputtered carbon in the process. The entire Raman spectral band of the carbon of Mahoney is not represented. The examiner deems it unlikely that the entire spectrum would be identical since the carbon made by the present invention has lower electrical resistance and is protective at small thicknesses neither disclosed or taught by Mahoney et al. Furthermore the results shown in Figures 5 and 6 are considered an advance in the carbon film art.

Application/Control Number: 09/986,863 Art Unit: 1773

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
